

LYON DENTAL IMPLANTS AND ORAL SURGERY

Pre Operative Instructions- Local Surgery

- Prescriptions
- Get prescriptions filled ahead of time
- Pain medication is for after the surgery. (Motrin/ibuprofen, or Tylenol #3/acetaminophen + codeine)
- The Peridex mouth rinse - start using morning and night (twice a day), at least one week prior to surgery - then you will start the rinse back up 3 days after surgery. This lowers the bacteria count, and reduces the risk of infection and dry socket.
- Ice Packs- If you were given an ice pack - please place in your freezer until the day of your surgery. Please bring on the day of your surgery - we can place it after surgery is completed.

If there are any questions or concerns, please feel free to call us.
